

MAHCERAM
OUTDOOR

The modern tile industry began in the 19th century with the invention of the steam-powered press, which allowed for mass production of tiles. In the early 20th century, tile factories began to use new technologies such as electric kilns and automated machinery, which increased production efficiency and allowed for more intricate designs. Today, tile factories continue to innovate with new materials and manufacturing processes, producing a wide range of tiles for various applications.

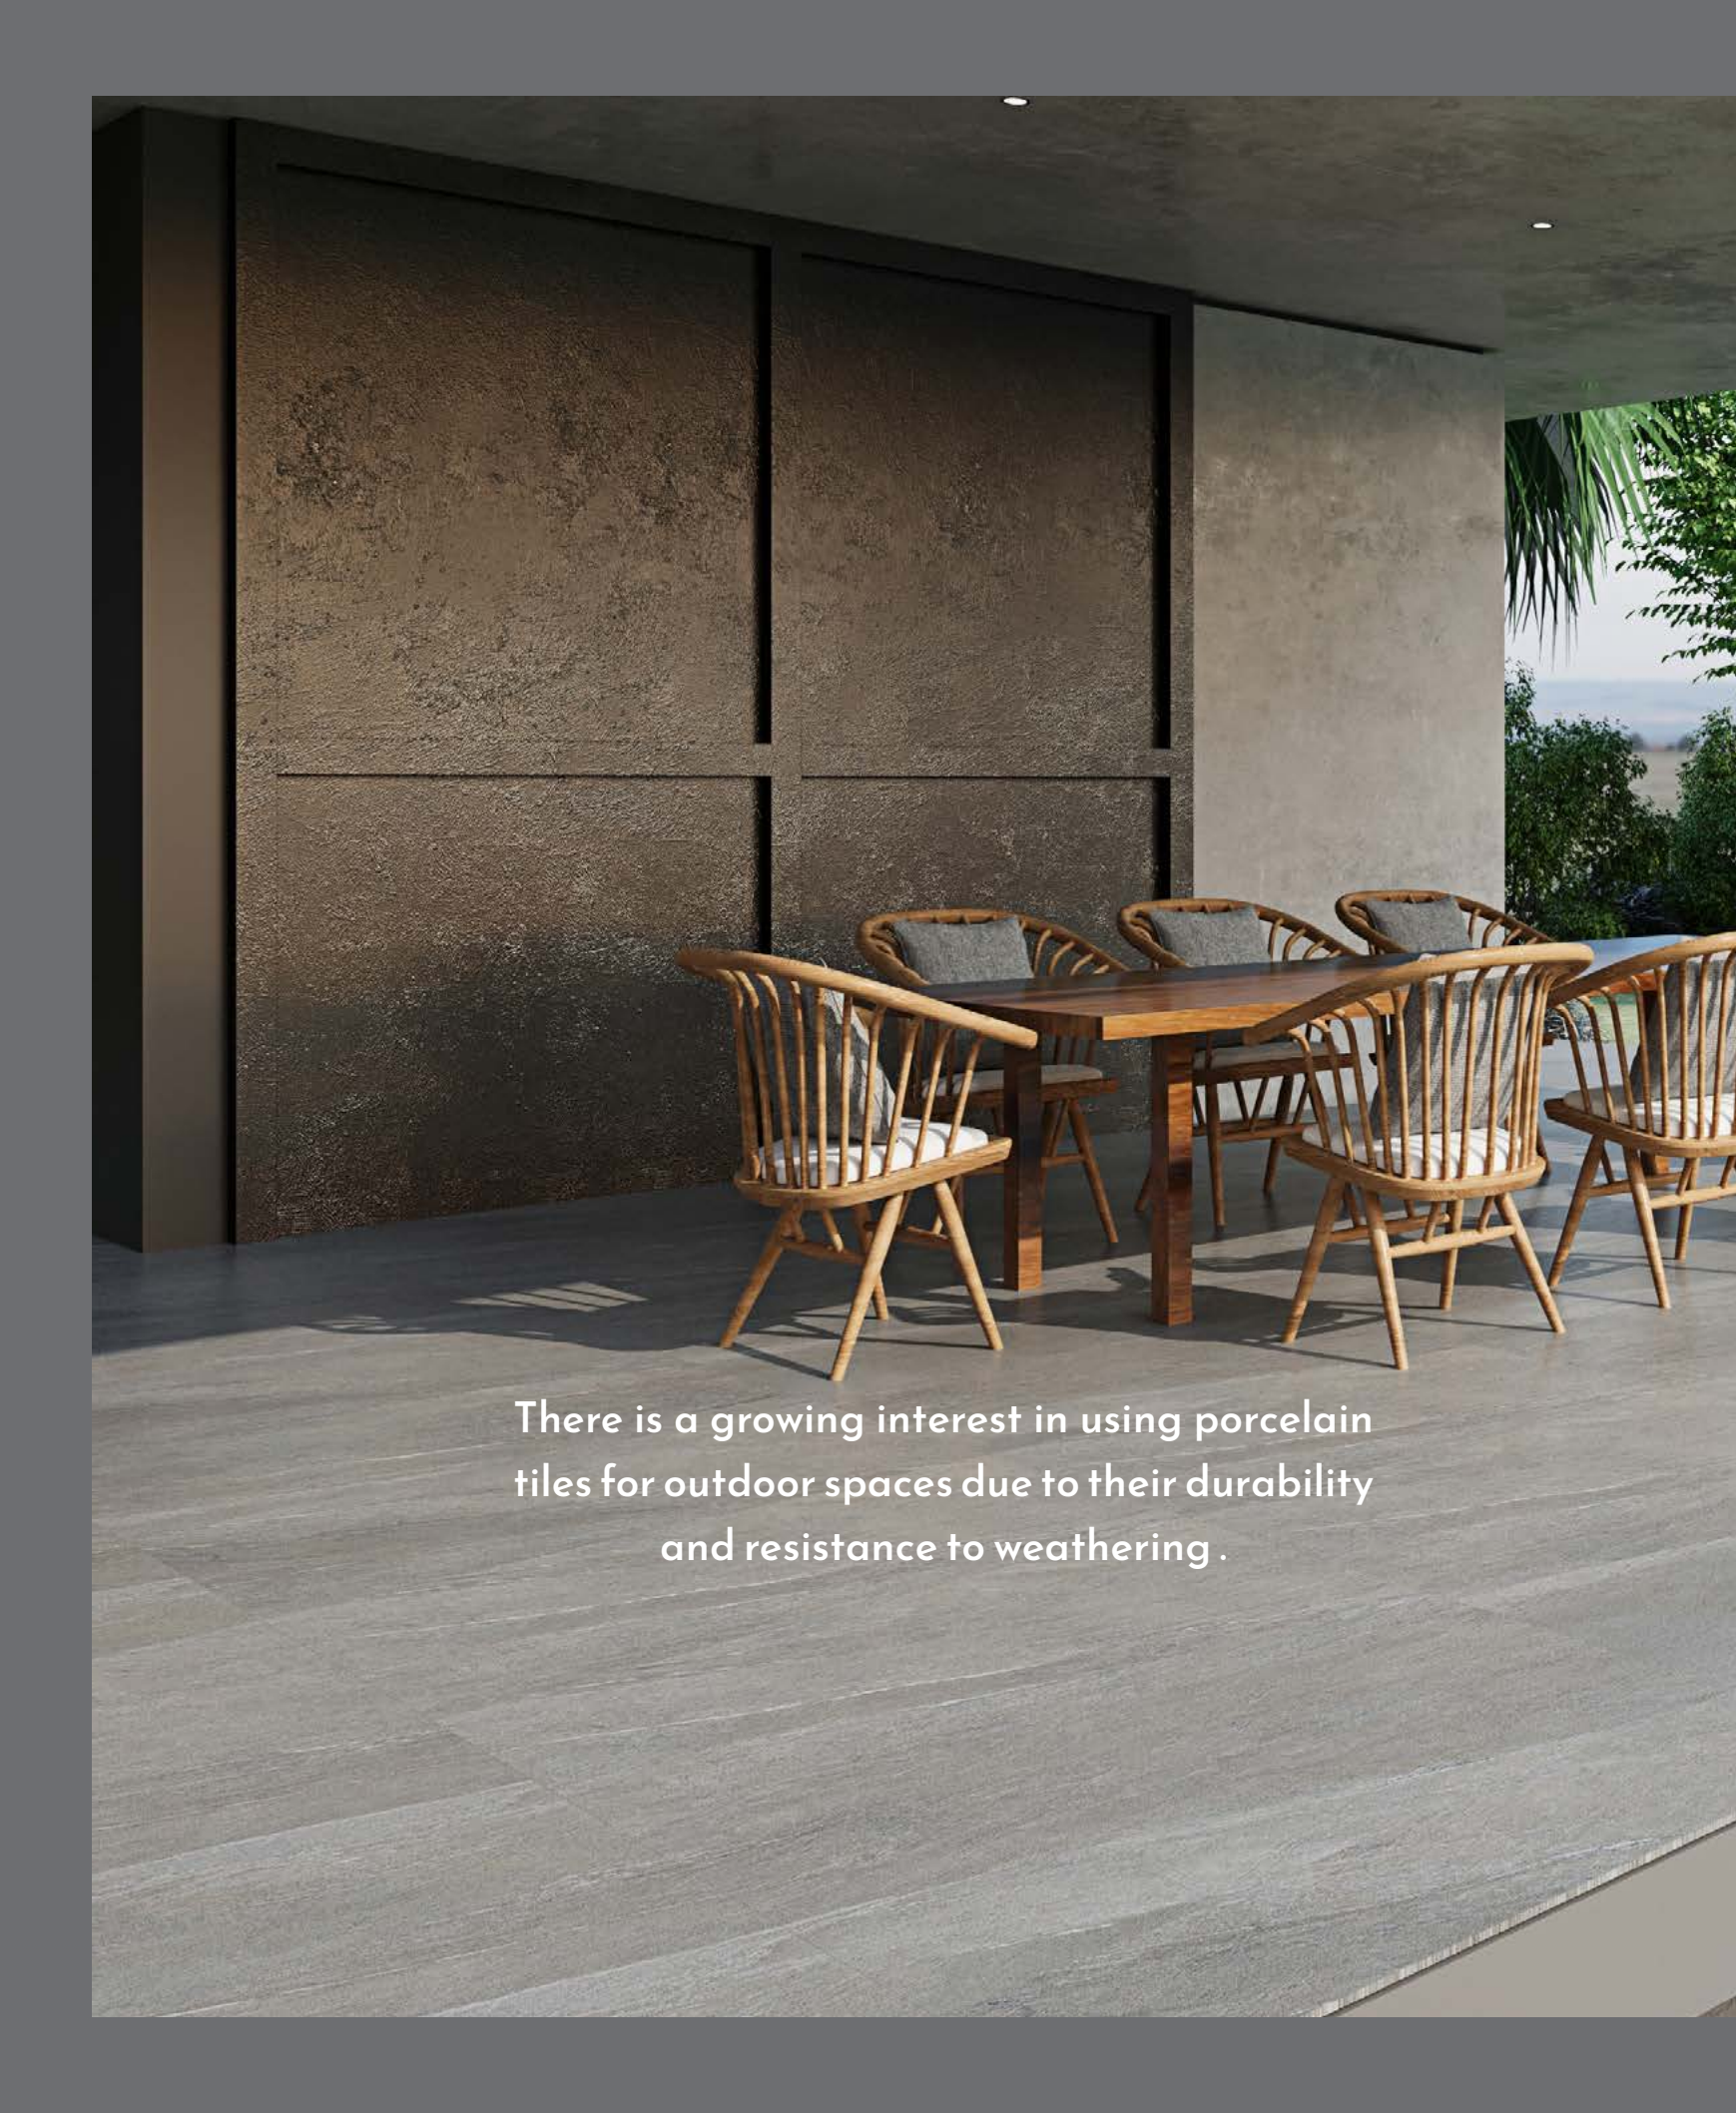

At the beginning, porcelain ceramic tiles

were made of kaolin clay and fired at high temperatures, resulting in a hard, durable material that was resistant to water and stains.

Today, porcelain ceramic tiles are a popular choice for flooring, walls, and countertops due to their durability, low maintenance, and versatility. They are made from a mixture of clay, feldspar, and other minerals, which are fired at high temperatures to create a dense, hard material.

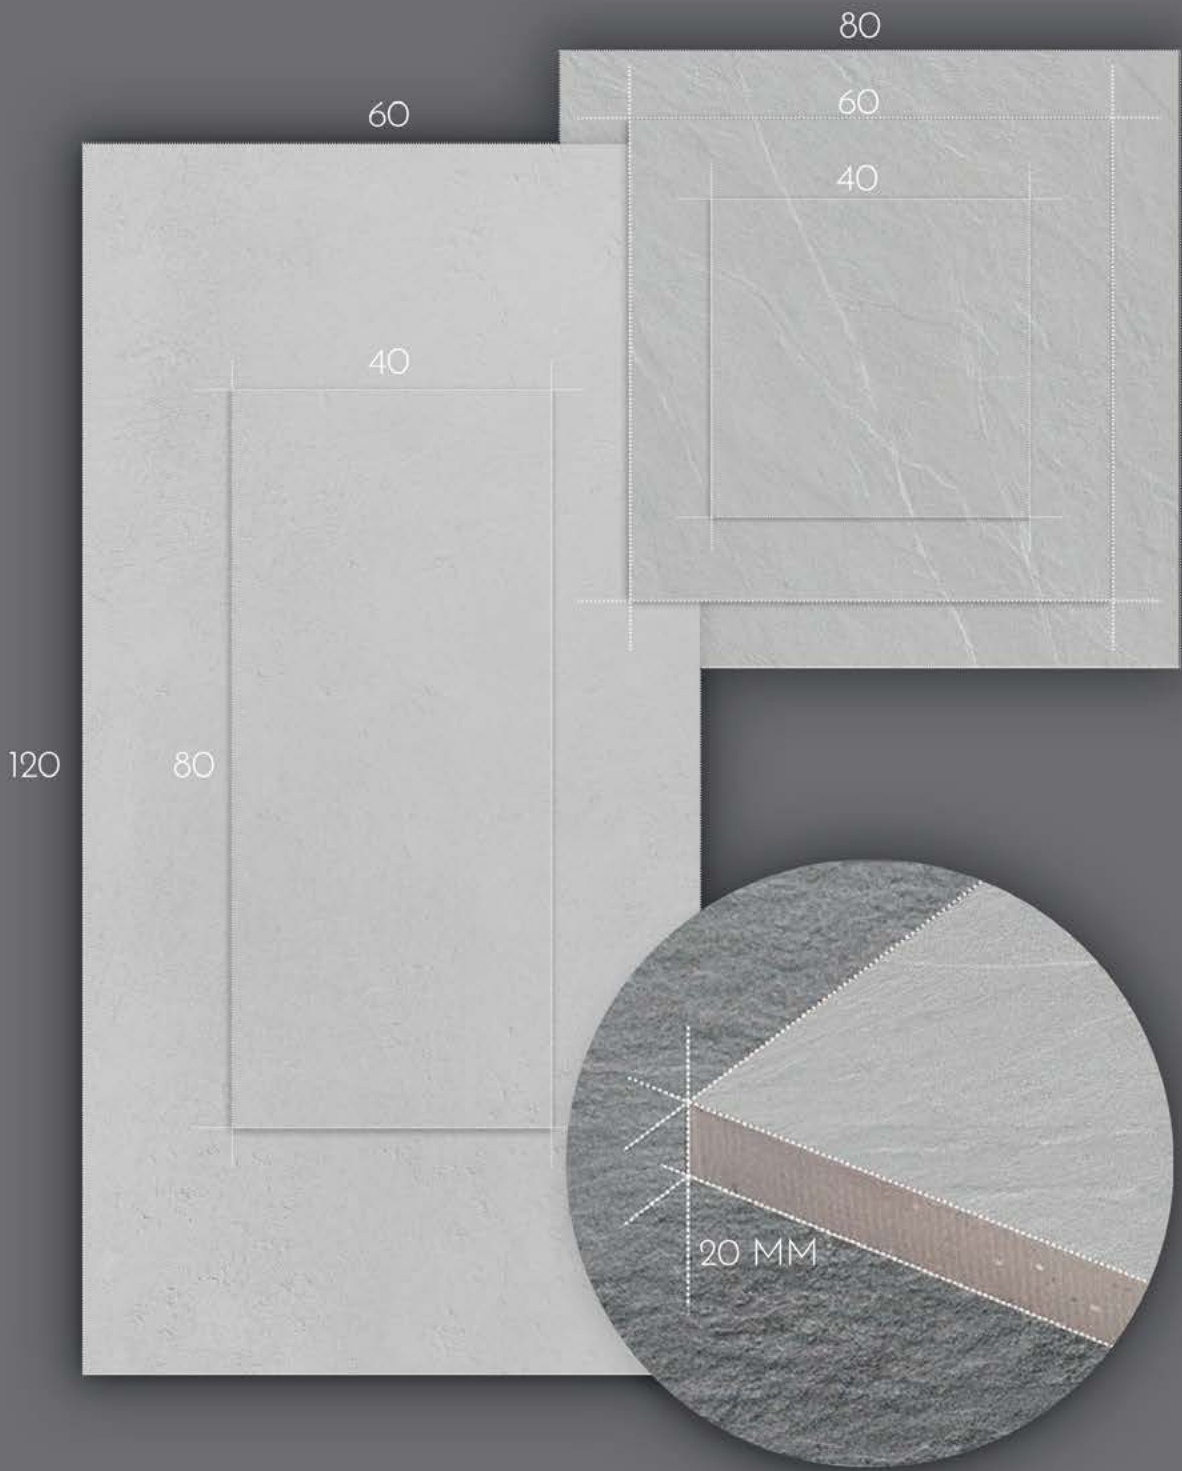

There is a growing interest in using porcelain tiles for outdoor spaces due to their durability and resistance to weathering .

Porcelain ceramic tiles are highly durable and can withstand heavy foot traffic. They are ideal for use in high-traffic areas such as entryways, hallways, and commercial spaces.

Properties

| Water Absorption

| Resistant To Stains

| Resistant To Deep Abrasion

| UV Resistant

| Resistant To Salt

| Slip resistant

| Frost resistant

| Chemical resistant

| Easy To Clean

| Resistant to Thermal Shocks

| Resistant To Scratches

| Easy To Install

Versatile Solutions

| Dry installation on grass

Effortless and rapid installation without the necessity of screeds, mortar, or adhesives, with a quick-drying feature.

| Dry installation on gravel

Installation is both speedy and uncomplicated, thanks to the dry application method that requires no mortar, screeds, or adhesives, and dries quickly.

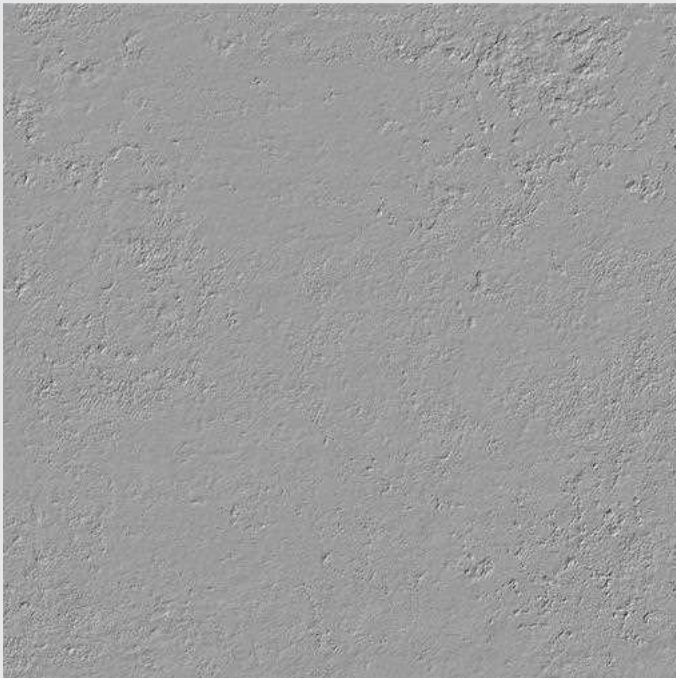

| Installation with adhesive

Conventional adhesive-based laying method.

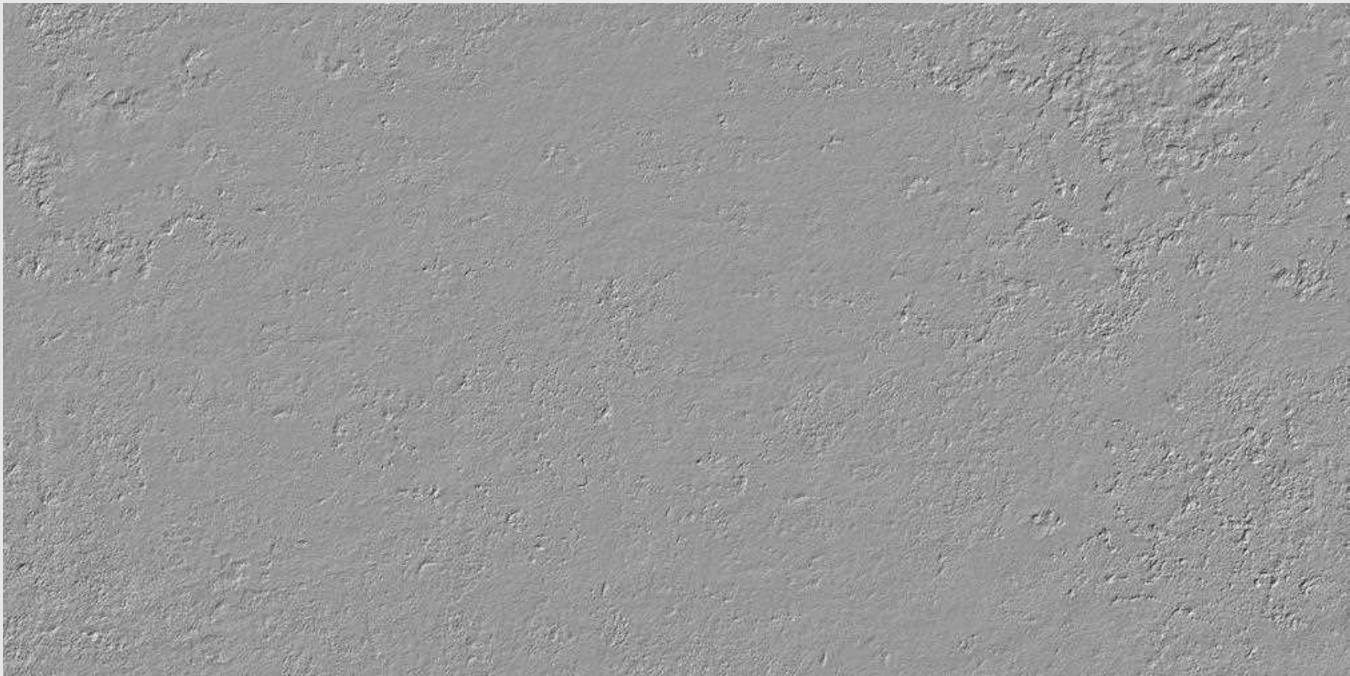

| Dry installation on sand

The dry installation method is straightforward and swift, with no need for adhesives or complicated mortar and screed processes.

Outdoor Spaces

Porcelain ceramic tiles can be used for outdoor applications such as patios and pool decks.

The frost resistant properties of porcelain ceramic tiles make them suitable for use in colder climates.
